## DETAILED ACTION

1. Applicant's arguments, filed 11/21/07, with respect to the rejection(s) of claim(s) 20-27 under 102(b) in view of Jones 553' have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the new cited patent Jones et al. 973'.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

.A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 20, 22, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones et al. 973'.

The patent to Jones 973' discloses a method of playing a collateral wagering game, progressive jackpot component, in combination with a standard wagering game, underlying five-card stud poker game. A group of up to seven entrants or players may play the game, see the seven betting locations 12. Each player makes a wager 14 for participating in the standard wagering game, col. 7, lines 39-41. Each player exercising an option to make an additional wager 20 on an outcome of the standard wagering game, five-card stud poker. The additional wager 20 is optional, see abstract and see col. 3, lines 1-21. The outcome of each player's hand is determined in the standard wagering game, five-card stud poker. If the player achieves a winning outcome in the

standard wagering game, five-card stud poker, the player receiving a prize amount of one-to-one odd for the standard wagering game, col. 8, lines 26-29. A player may win the standard wagering game, underlying five-card stud poker game, without having to place said additional wager for participating in the collateral wagering game, see col. 3, lines 13-17 which recites “if the player places a wager in the bet box, but does not insert a token into the progressive jackpot coin acceptor, then the dealer assumes that the player wishes to participate in a wager only for the underlying game”. If the player has made an additional wager for participating in the collateral wagering game, progressive jackpot component, a prize value is allocated to the collateral wagering game based upon the winning outcome in the standard wagering game. A total prize value is determined for the player in the collateral wagering game when the player has made the additional wager for participating in the collateral wagering game, see Table 7, col. 7, lines 21-33. Thus a winning player is paid the prize amount as determined in the standard wagering game, underlying five-card poker game, one-to-one odds, and the total prize value for the collateral wagering game, progressive jackpot component, the player is entitled to receive.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 21, 23, 25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al. 973'.

In regard to the claimed "determining said total prize amount for said player by adding the prize amount won by said player in said standard wagering game to said prize value in said collateral wagering game multiplied by a number of winning shares owned by said player in the collateral wagering game", determining exactly total prize amount paid to the player in Jones et al. 973' game, (e.g. % amount of the Jackpot according to a predetermined hand, fixed amount according to a predetermined hand,, a multiple of the amount wagered by the player, etc.) is simply a casino business decision dependent of on the amount of profit and revenue the casino wishes to make.
